SAP® Solutions
SAP Business One

INNOTECH Innovative Technologies is a leading manufacturer of state-of-the-art plant and beverage solutions and is present in the world's leading wine markets. The company chose SAP Business One after a thorough evaluation, based on reference companies that have adopted the ERP solution for growing businesses. The Veronese company was looking for a system that would standardize its processes and connect all its activities and SAP Business One meets all of those needs.

Before: challenges and opportunities

- Needed an ERP to manage all activities and information in a more streamlined manner
- Looking to digitize information and business processes and connect data between various business units
- Required tighter control and digital management of process manufacturing

Why SAP and InformEtica Consulting

- SAP has been chosen by many companies for its SAP Business One and would play a key role in the digital transformation that Innotec had already started
- InformEtica Consulting was chosen because it is a SAP Gold Partner and had glowing client reviews

After: value-driven results

- With SAP Business One, the financial department is fully under control
- Standardized and digitalized management of business processes
- Easy retrieval of information
- Greater efficiency and transparency of processes

“There is always room for improvement. With SAP Business One and its partners, this is possible.»

Luca Zavarise, CEO Innotec Tecnologiche

Featured Partner

€6m to €11M

Revenue growth from 2016 to 2018
