CBE provides customized electrical and electronic system solutions at a European level and needs careful monitoring of the materials, workmanship and cost of each single job. That is why in 2013, CBE chose SAP Business One with the LPOne add-on to better manage production.

Objectives

- Manage production with order entry
- Check the cost of the order entry
- Check the cost of the order entry to ensure the right profitability
- To be more competitive in order to establish it self in the foreign market

Why SAP, LPOne and Start & Stop

- SAP allows you to control highly articulate processes
- SAP is multilingual and multilocalised
- LPOne allows the management of customized production
- LPOne is fully integrated with SAP Business One
- Start & Stop allows you to detect the progress in the production development

Benefits

- Optimization of the production cycle
- Better use of productive resources
- Work account management

25%

Increased turnover in the last 4 years

83%

Incidence of foreign turnover

95%

Management by order

“InformEtica has a good understanding of the product, SAP Business One and its add-ons, and a high standard of professionalism shown by the technical consultants.”

Dorian Sosi, Sales Manager Italy, CBE Srl
