

FabricaLab: SAP Business One® the complete easy-to-use ERP platform

FabricaLab, a leader in the Business Intelligence segment, is active in the software, solutions and ICT services market. FabricaLab provides *application maintenance* services, integrated projects and products, ensuring the best quality for manufacturing and service companies, mainly in the Fashion & Luxury sector. For twelve years SAP Business One has allowed FabricaLab precise control over financial transactions.

Business needs

- The previous ERP platform was slow and did not meet business needs
- The company, with its different offices, needed a complete ERP system that simplified the company's accounting management

Why SAP and InformEtica

- «InformEtica is the perfect partner to help us exploit the potential of the SAP Business One platform».
- SAP Business One is an easy-to-navigate platform and greatly simplifies the consultation process.
- A well-structured platform like SAP Business One simplifies the consolidation and integration steps of the company with multiple branches.
- SAP Business One is an easy-to-use and intuitive tool.

Results

- All the operational and organizational phases of a project are under control.
- The calculation of costs and revenues of the project was very simplified.
- Ability to create a report at any time that allows you to make business decisions with real and complete data
- Single monthly closing with the different corporate offices that work with SAP Business One.
- Periodically monitor planned, current and incurred expenses.
- In financial management, margins have been improved and errors have been reduced.

“Working in the IT sector, there was no need to carry out a complicated selection process, we knew the performance of the SAP Business One platform well, and it was the first choice. After twelve years I can say that we are very satisfied”
